### DETAILED ACTION

1. This communication is in response to Applicant's amendment filed April 19, 2007. Claims 9-30 are currently pending in this case. The requirement for restriction mailed on August 9, 2007 is hereby withdrawn.

### *Response to Arguments*

2. Applicant's arguments with respect to claims 9-30 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 9-30 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The return of the data to the key facility for decrypting, critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

5. Independent claims 9, 18, 27, 28, 29, and 30 each present a failure to clearly show the steps between the receiver facility and the key facility. Specifically, the receiver facility receives the encrypted data from the key facility and then requests that the key facility decrypt the data. It is the Examiner's understanding that the said data is returned to the key facility for encryption. The claims, however, are silent on this matter,

Art Unit: 3621

thus the claims are not enabled. Thus independent claims 9, 18, 27, 28, 29, and 30 and their dependent claims 10-17 and 19-26 are not enabled.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 18-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claims 18-30 present numerous instances failure to particularly point out and distinctly claim the subject matter of the invention. Examples of these are, in claim 18, including but not limited to:

encrypting data (who encrypts?)  
encrypting the first encrypted part (who encrypts?)  
combining the third encrypted part (who combines?)  
sending (who sends?) the data block;  
receiving the data block (who receives?)  
splitting the data block (who splits?)  
generating a request (who generates?)

### ***Claim Rejections - 35 USC § 102***

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3621

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 9-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Ginter et al (US 5,892,900).

11. Ginter discloses a data transfer system comprising; a key facility; a sender facility configured to communicate with the key facility. (e.g. col 67 ln 48 – col 68 ln 27, col 118 ln 25-40, fig 62).

12. We further note that, while features of an apparatus may be recited either structurally or functionally, claims directed to an apparatus must be distinguished from the prior art in terms of structure rather than function. *In re Schreiber*, 128 F.3d 1473, 1477-78, 44 USPQ2d 1429, 1431-32 (Fed. Cir. 1997) (The absence of a disclosure in a prior art reference relating to function did not defeat the Board's finding of anticipation of claimed apparatus because the limitations at issue were found to be inherent in the prior art reference); see also *In re Swinehart*, 439 F.2d 210, 212-13, 169 USPQ 226, 228-29 (CCPA 1971); *In re Danly*, 263 F.2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990) (emphasis in original). In this case we note that a "system is an apparatus." *Ex parte Fressola*, 27 USPQ2d 1608, 1611 (B.P.A.I. 1993) (citations omitted). Additionally, "[c]laims in apparatus form conventionally fall into the 35 U.S.C. §101 statutory category of a 'machine.'" *Ex parte Donner*, 53 USPQ2d 1699, 1701 (B.P.A.I. 1999)(unpublished), (Paper No. 34, page 5, issued as U.S. Patent 5,999,907). Therefore, it is the Examiner's position that Applicant's system claims are "product," "apparatus," or more specifically, "machine" claims. It is the Examiner's position, that

Art Unit: 3621

further, the various modules, receivers and splitters, etc in claim 9 are software, and thus do not further distinguish claim 9 and its dependent claims from the prior art.

***Allowable Subject Matter***

13. Claim 9-30 are likely allowable, if rewritten to overcome the above rejections.

14. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.
